Proper Citation: Tufts University Department of Neuroscience (RRID:SCR_007491)

Description: The Graduate Program in Neuroscience at Tufts University School of Medicine is a member of the Sackler School Integrated Studies Program (ISP). The research programs of the 20 faculty members incorporate a broad range of approaches - from molecular to systems analysis - to understand the form and function of the nervous system, with a particular emphasis on the synapse. The graduate course of study, likewise, strongly emphasizes multidisciplinary training to prepare students for research careers in the complex field of neuroscience. Such training is additionally promoted through the technical expertise and research facilities offered by the Tufts Center for Neuroscience Research (CNR).It is based in newly renovated space in the Neuroscience Department, occupying three floors of the Tufts Medical School research complex in downtown Boston.
