Proper Citation: University of Missouri Department of Medical Pharmacology and Physiology (RRID:SCR_007518)

Description: The Department of Medical Pharmacology and Physiology has been known for outstanding programs in exercise physiology and cardiovascular physiology. The Department offers both Master of Science (MS) and Doctor of Philosophy (PhD) degree programs that provide students with excellent preparation for a variety of challenging and rewarding careers. The degrees offered are programs in Pharmacology or Physiology. The Medical Pharmacology and Physiology Department and its modern research and teaching facilities are on campus in the School of Medicine. The research laboratories of the faculty have excellent equipment and maintenance support. The award-winning Health Sciences Library, containing a wide variety of current journals and resource books, is located in the School of Medicine. Modern student computer stations are also available. Animal quarters and animal care are under the direction of qualified veterinarians. Other important University facilities include a nuclear reactor for providing short-lived radioisotopes and a campus-wide computer network. The Center for Gender Physiology manages four core facilities that provide animal models, equipment and expertise required to explore gender differences in physiological function.
