Description: THIS RESOURCE IS NO LONGER IN SERVICE, documented June 14, 2013. GeneNote is a database of human genes and their expression profiles in healthy tissues. It is based on Weizmann Institute of Science DNA array experiments, which were performed on the Affymetrix HG-U95 set A-E. It offers: An expression profile (tissue vector) for each gene in the human genome Gene and tissue clustering based on expression profiles A full genome ranking procedure according to the gene's tendency for tissue specificity, from tissue-specific to housekeeping genes.
