Proper Citation: Spatio- Spectro- Temporal Receptive Field (RRID:SCR_007995)

Description: STRFPak is a Matlab toolbox for estimating the linear and nonlinear stimulusresponse mapping function of sensory systems. This mapping function is commonly called the spatio- or spectro-temporal receptive field (STRF). A quantitative estimate of the STRF can be used in subsequent computational modeling studies or to predict future responses of the system. STRFPak implements several general STRF estimation techniques and can be used with any stimuli (including natural scenes and sounds). The theoretical basis for STRF estimation has been known for some time, but estimation software has not been widely available. This project aims to develop appropriate software and make it available to the wider community of sensory neuroscientists. Although STRFPak is based on established methods it incorporates two important innovations. First, STRFPak can be used to characterize a sensory system from its response to arbitrary stimuli including natural signals (e.g., vocalizations, natural scenes). Second, STRFPak incorporates several methods for estimating nonlinear STRFs. STRFPak also includes tutorial examples and documentation.

Synonyms: STRFPak

Resource Type: software resource

Keywords: matlab, neuroscience, nonlinear, receptive field, response, sensory, signal, spatio, spectro, stimulus, sensory system, temporal

Funding:

Resource Name: Spatio- Spectro- Temporal Receptive Field

Resource ID: SCR_007995

Alternate IDs: nif-0000-07191

Record Creation Time: 20220129T080244+0000

Record Last Update: 20250420T014408+0000

Ratings and Alerts

No rating or validation information has been found for Spatio- Spectro- Temporal Receptive Field.

No alerts have been found for Spatio- Spectro- Temporal Receptive Field.
