## Cross-National Equivalent Files

RRID:SCR\_008935

Type: Tool

### Proper Citation

Cross-National Equivalent Files (RRID:SCR\_008935)

### Resource Information

**URL:** <http://cnef.ehe.osu.edu/#sthash.WuGubz1D.dpuf>

**Proper Citation:** Cross-National Equivalent Files (RRID:SCR\_008935)

**Description:** A dataset, 1970-2009, containing equivalently defined variables for the British Household Panel Study (BHPS), the Household Income and Labour Dynamics in Australia (HILDA), the Korea Labor and Income Panel Study (KLIPS) (new this year), the Panel Study of Income Dynamics (PSID), the Russia Longitudinal Monitoring Survey (RLMS-HSE) (new this year), the Swiss Household Panel (SHP), the Canadian Survey of Labour and Income Dynamics (SLID), and the German Socio-Economic Panel (SOEP). The data are designed to allow cross-national researchers not experienced in panel data analysis to access a simplified version of these panels, while providing experienced panel data users with guidelines for formulating equivalent variables across countries. The CNEF permit researchers to track yearly changes in the health and economic well-being of older people relative to younger people in the study countries. The equivalent file provides a set of constructed variables (for example pre- and post-government income and United States and international household equivalence weights) that are not directly available on the original surveys. Since the Cross-National Equivalent File 1970-2009 can be merged with the original surveys, PSID-CNEF users can easily incorporate these constructed variables into current analyses. The most recent release of the Equivalent File includes: \* BHPS data from 1991 to 2005 on over 21,000 individuals and approximately 6,000 households. \* GSOEP data from 1984 to 2007 on over 20,000 individuals and approximately 6,000 households in Germany. \* HILDA data from 2001 to 2006 on over 19,000 individuals and 7,000 households. \* PSID data from 1980 to 2005 on over 33,000 individuals and approximately 7,000 households. \* SHP data from 1999 to 2006 on 12,900 individuals and 5,000 households. \* SLID data from 1993 to 2006 on over 95,000 individuals and approximately 32,000 households. With one exception, the CNEF country data are available on CD-ROM from Cornell University for a fee. The Canadian SLID data are not distributed on the CD but are available to CNEF registered researchers through special arrangements with Statistics Canada. Complete instructions for obtaining CNEF data may be accessed on the project website. \* Dates of Study: 1980-2007 \* Study Features: International, Longitudinal \* Sample Size: \*\* BHPS: 21,000+ \*\* PSID: 33,000+ \*\*

**Abbreviations:** CNEF

**Synonyms:** Cross-National Equivalent Files (CNEF)

**Resource Type:** data or information resource, data set

**Keywords:** attitude, economic behavior, employment, family, health status, household expenditure, household income, housing, income, late adult human, poverty, canada, germany, great britain, united states, global

**Related Condition:** Aging

**Funding:** NIA 10-P-98358-5-02

**Availability:** Available on CD-ROM from Cornell University for a fee

**Resource Name:** Cross-National Equivalent Files

**Resource ID:** SCR\_008935

**Alternate IDs:** nlx\_151820

**Old URLs:** <http://www.human.cornell.edu/che/PAM/Research/Centers-Programs/German-Panel/cnef.cfm>

**Record Creation Time:** 20220129T080250+0000

**Record Last Update:** 20260821T193844+0000
