Proper Citation: CHB Diagnostic Radiology Core (RRID:SCR_009711)

Description: Within Children's Hospital Boston's Department of Radiology, Diagnostic Radiology offers standard radiography (conventional X-rays) and fluoroscopy, an imaging technique that uses X-rays to create real-time images of the body. We perform more than 135,000 exams each year in Boston and at our satellite locations, which makes us one of the country's largest general diagnostic centers for children.

Resource Type: core facility, service resource, access service resource
