Proper Citation: Harvard FAS Center for Brain Science - Neuroimaging Core Facility (RRID:SCR_009842)

Description: The Neuroimaging facility has a 3-Tesla magnetic resonance imaging scanner for non-invasive human brain imaging. Our aim is to: * Provide functional and anatomic magnetic resonance imaging (MRI) to scientists studying human cognition, brain development and aging, and individual differences * Provide training for undergraduate and graduate students destined to become the next generation of neuroscientists * Pioneer innovative ways of imaging the human brain and is a first adopter of new neuroimaging technology, tools and applications * Develop and make available the data processing and visualization tools demanded by advancing neuroimaging technologies.

Resource Type: core facility, access service resource, service resource
