Proper Citation: OHSU In Vivo Optical Imaging Center (RRID:SCR_009982)

Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on December 6, 2022. Core facility that provides the following services: Use of IOIC facility, In vivo optical imaging training service. The IOIC is located in Cardiac Imaging Laboratory on the first floor of the Biomedical Research Building (BRB). The laboratory was established through a Shared Instrument Grant (PI: Michael Deininger) but is maintained through user fees. The core facility includes the IVIS Spectrum optical imaging camera housed in a light-tight housing, rat and mouse imaging platforms for multi-subject simultaneous acquisition, an integrated inhaled anesthesia system, and advanced analysis software. A key component of the IOIC is the ability to operate either independently or under the guidance and supervision of core personnel. Independent use of the system requires that investigators undergo training that is offered every 2 months or on an ad hoc basis. All analysis will be charged on an hourly basis and is graduated according to the level of service (independent or supervised).
