Proper Citation: Ragon Institute Imaging Core Flow Cytometry (RRID:SCR_010056)

Description: Core facility that provides the following services: Flow Cytometric Cell Sorting. The mission of Ragon Institute Imaging Core, Flow Cytometry Division is to provide training and access to flow cytometers with up to 18 parameters, as well as cell sorting of biohazardous samples. As an MGH Core Facility, the Ragon Institute Imaging Core serves the greater MGH community. Since the Ragon Institute is also a collaboration between MGH, Harvard, and MIT, so too does the facility welcome members of the MIT and Harvard communities. The facility is equipped with three LSR2?s, an LSR Fortessa, a FACSCalibur, and a FACSAria IIu cell sorter in a biosafety cabinet. The core also serves as a resource for addressing a variety of flow cytometry needs including consultation on topics related to experimental design and sample preparation.

Resource Type: access service resource, core facility, service resource

Keywords: cell separation
