Proper Citation: BEAST (RRID:SCR_010228)

Description: A cross-platform software program for Bayesian MCMC analysis of molecular sequences. It is entirely orientated towards rooted, time-measured phylogenies inferred using strict or relaxed molecular clock models. It can be used as a method of reconstructing phylogenies but is also a framework for testing evolutionary hypotheses without conditioning on a single tree topology. BEAST uses MCMC to average over tree space, so that each tree is weighted proportional to its posterior probability. We include a simple to use user-interface program for setting up standard analyses and a suit of programs for analysing the results.

Synonyms: BEaST Segmentation Library, Beast Software

Resource Type: software application, data analysis software, data processing software, sequence analysis software, software resource, software repository

Defining Citation: DOI:10.1186/1471-2148-7-214

Keywords: bio.tools

Funding:

Resource Name: BEAST
