Description: THIS RESOURCE IS NO LONGER IN SERVICE. Documented on April 25,2024. Indiana University School of Medicine Proteomics Core Facility provides protein and proteomic analysis services for protein identification, characterization, and quantification. The Core encourages collaborations that apply the tools of proteomics to cutting-edge biomedical research. Established in 2001, the Core has become a center not only for services but also for collaborative research and development of new technological platforms for proteomic research. The Core is available to Indiana Universities and the wider research community. Over the years, our facility has worked with many pharmaceutical and biotech companies, and developed a number of SOPs for biomarker discovery, mass spec-based protein quantification for biomarker discovery and multiple-reaction-monitoring (MRM) for protein assays and biomarker validation. Our goal is to deliver value to our investigators and our community as a world-class proteomics core lab providing services to meet the critical needs of biomedical researchers in life science industries and academia.
