Proper Citation: Sanford Burnham Prebys Medical Discovery Institute Assay Development Core Facility (RRID:SCR_014867)

Description: Core facility that performs design, development, validation and pilot screening of biological high-throughput assays. It provides services such as designing and developing de-novo assays, converting low-throughput lab protocols (e.g. cuvette- or gel-based) into plate-based HTS assays, and access to major robotic equipment and resources. The facility also provides direct assistance with preparing screening-related grants, guidance through assay development stages, help in designing testing funnels, and generation of preliminary data.
