Description: JavaScript plug-in software application for web environments to analyze data. It is an interactive Venn diagram viewer.Used for comparing lists with Venn Diagrams. It handles up to six input lists and presents results using classical or Edwards-Venn layouts. User interactions can be controlled and customized.

Resource Type: data analysis software, data processing software, data visualization software, software application, software resource

Keywords: analyze, data, Venn, diagram, visualisation, independent, platform

Availability: Free, Available for download, Freely available

Resource Name: jVenn
