Description: Independent, non-profit organization that has developed global data-sharing and analytics platform to promote, coordinate, and facilitate scientific sharing and reuse of clinical research data through creation and implementation of sustainable global data-sharing enterprise. Our focus is on sharing individual participant-level data from completed clinical trials. Users can search listed studies, request data sets from data contributors, aggregate data, or share data of their own. Vivli (Center for Clinical Research Data) is launching a portal to share participant-level data from COVID trials.

Resource Type: service resource, organization portal, data or information resource, portal, storage service resource, data repository

Keywords: Global data sharing, clinical research data, data, sharing, analytical platform, clinical trial, COVID-19-related trials

Related Condition: COVID-19
