Description: Electronic microtome cryostat upright standing with open top working area that can cut temperature to negative 35 degrees Celsius. Equipped with automatic 24 hour defroster with interrupt key and handwheel brake. Provides protection for knife and specimen as it retracts specimen at the end of the cut. Motorized coarse feed system allows sample to be moved forward and backward. Two knife carriers are available. Standard knife carrier is for knives to be easily clamped in place and adjusted, and the disposable blade holder EC for high- and low-profile blades.
