Description: Open source software R package for inferring large transcriptional networks using mutual information. Implements algorithms for inferring networks such as gene networks from microarray data.

Synonyms: Mutual Information NETworks

Resource Type: network analysis software, software resource, software application, data analysis software, software toolkit, data processing software

Defining Citation: [PMID:18959772](#)

Keywords: Inferring transcriptional network, mutual information, gene network, microarray data, gene, statistical dependencies model, gene to gene interaction, statistical quantification, bio.tools

Funding: Communauté Française de Belgique

Availability: Free, Available for download, Freely available

Resource Name: minet
