Description: Software tool for distributed dimensionality reduction and visualization. Distributed software for visualizing intrinsic structure of large scale single cell data written in C language. Its distributed storage and distributed computation technique allows efficiently analyze large scale single cell data at cost of constant time speedup.

Resource Type: software application, data visualization software, data analysis software, data processing software, software resource

Keywords: Distributed dimensionality reduction, dimensionality reduction, distributed storage, distributed computation, large scale data, single cell data, data, , bio.tools
