Proper Citation: Agilent: BioTek: Synergy H4 Hybrid Plate Reader (RRID:SCR_019750)

Description: Synergy H4 combines the sensitivity of a filter-based system with the of monochromator-based optics to provide the broadest range of applications available on the market today. Detection modes: Fluorescence Intensity, Time-Resolved Fluorescence, Fluorescence Polarization, AlphaScreen/AlphaLISA, Luminescence, UV-Visible absorbance, FRET, TR-FRET, BRET, well area scanning and spectral scanning. Synergy H4 optics incorporates two double-grating monochromators. This quadruple design provides the best in spectral scanning performance and flexibility. Synergy H4's filter/dichroic combination provides the best possible performance in fluorescence, time resolved fluorescence and fluorescence polarization applications.

Resource Type: instrument resource

Keywords: Biotek, Hybrid Plate Reader, Instrument, Equipment,

Availability: Commercially available
