Brain Intensity AbNormality Classification Algorithm

RRID:SCR 024928

Type: Tool

Proper Citation

Brain Intensity AbNormality Classification Algorithm (RRID:SCR_024928)

Resource Information

URL: https://fsl.fmrib.ox.ac.uk/fsl/fslwiki/BIANCA

Proper Citation: Brain Intensity AbNormality Classification Algorithm (RRID:SCR_024928)

Description: Software tool for automated segmentation of white matter hyperintensities. Classifies image's voxels based on their intensity and spatial features, and the output image represents the probability per voxel of being WMH. Flexible in terms of MRI modalities to use and offers different options for weighting spatial information, local spatial intensity averaging, and different options for choice of number and location of training points.

Abbreviations: BIANCA

Synonyms: BIANKA: Brain Intensity AbNormality Classification Algorithm

Resource Type: data processing software, image analysis software, segmentation software, software resource, software application

Defining Citation: PMID:27402600

Keywords: images voxels classification, automated segmentation of white matter hyperintensities, white matter hyperintensities,

Funding: Wellcome Trust;

Wolfson Foundation; UK Stroke Association;

NIHR Oxford Biomedical Research Centre

Availability: Free, Freely available

Resource Name: Brain Intensity AbNormality Classification Algorithm

Resource ID: SCR_024928

Record Creation Time: 20240129T210604+0000

Record Last Update: 20250426T061035+0000

Ratings and Alerts

No rating or validation information has been found for Brain Intensity AbNormality Classification Algorithm.

No alerts have been found for Brain Intensity AbNormality Classification Algorithm.

Data and Source Information
