Description: Multi-mode microplate reader that measures chemical, biological, and physical reactions in microplates. It comes equipped with our LVF Monochromators, filters, and spectrometer. The instrument is upgradable and can be equipped with non-isotopic detection technologies:UV/vis absorbance, Fluorescence intensity, including FRET,Luminescence (flash and glow), including BRET,Fluorescence polarization/anisotropy,Time-resolved fluorescence, including TR-FRET AlphaScreen / AlphaLISA / AlphaPlexTM. Atmospheric Control Unit, temperature incubation, multiple shaking, well scan and reagent injectors make the CLARIOstar Plus the ideal platform for any live cell-based assay.
