Description: Core offers computing and storage resources, along with support and training. Currently, Grex system consists of over 10,000 CPU cores connected via low-latency InfiniBand interconnect, several GPU compute nodes, 2 Petabytes of high-performance Lustre storage, and tape backup system. System also provides for condominium model of hosting researcher-contributed hardware funded by Canada Foundation for Innovation (CFI) and other granting agencies.

Abbreviations: Grex

Synonyms: , Grex High-Performance Computing system at University of Manitoba

Resource Type: access service resource, computational service resource, core facility, service resource, storage service resource

Keywords: ABRF, High Performance Computing and Collaboration, Research Computing, Theoretical Chemistry, Machine Learning, Materials Modelling, Bioinformatics, Climate Research, Digital Agriculture

Funding: Canada Foundation for Innovation

Availability: Restricted

Resource Name: University of Manitoba Grex High Performance Computing Core Facility
