Proper Citation: Biochrome: BioDrop Duo+ Microvolume Spectrophotometer (RRID:SCR_028652)

Description: Spectrophotometer to rapidly quantify and assess the purity of extremely small biological samples (like DNA, RNA, oligonucleotides, and proteins). It has a patented, maintenance-free sample port that allows you to measure sample volumes as small as 0.5 μ L to 1 μ L without needing a cuvette. In addition to the micro-volume port, it includes a standard 10 x 10 mm cuvette port. This allows for traditional spectrophotometry uses like enzyme kinetics, cell density (OD600) measurements, or assays requiring larger volumes.
