BBDP/Rhw

RRID:RGD_10002

Type: Organism

Proper Citation

RRID:RGD_10002

Organism Information

URL: <https://rgd.mcw.edu/rgdweb/report/strain/main.html?id=10002>

Proper Citation: RRID:RGD_10002

Description: Rattus norvegicus with name BBDP/Rhw from RGD.

Species: Rattus norvegicus

Notes: S. Bieg and coworkers (1998) generated a congenic line in which diabetes and lymphopenia are controlled solely by Iddm 1. This strain was generated by nine cycles of cross-intercross breeding of diabetes-prone DP with DR BB rats. Iddm 1 in the BioBreeding (BB) rat designates the genomic region on rat Chromosome (Chr) 4 that harbors the gene causing peripheral T cell lymphopenia (Lyp) and diabetes. The average age of onset of diabetes was 85 ± 53 days of age after the first and 67 ± 10 days of age after the 9th cycle.

Catalog Number: 10002

Background: inbred

Database: Rat Genome Database (RGD)

Database Abbreviation: RGD

Availability: Unknown

Alternate IDs: 10002

Organism Name: BBDP/Rhw

Record Creation Time: 20230509T191926+0000

Record Last Update: 20260912T202458+0000

Ratings and Alerts

No rating or validation information has been found for BBDP/Rhw.

No alerts have been found for BBDP/Rhw.
