Description: Rattus norvegicus with name WAG from RGD.

Species: Rattus norvegicus

Notes: AL Bacharach, Glaxo Ltd 1924 from Wistar stock. Note that the presence of different coat color alleles in some sublines implies that this strain may have become genetically contaminated at some time in the past. It is therefore important that the subline should be stated carefully in published work. WAG/Cpb clearly differs from other sublines at many loci (Festing and Bender 1984).

Catalog Number: 61008
