Proper Citation: RRID:WB-STRAIN:WBStrain00036100

Description: *Caenorhabditis elegans* with name unc-94(ok1210) I/hT2 [bli-4(e937) let-?(q782) qIs48] (I;III). from WB.

Species: *Caenorhabditis elegans*

Synonyms: unc-94(ok1210) I/hT2 [bli-4(e937) let-?(q782) qIs48] (I;III).

Notes: C06A5.7a. Homozygous sterile deletion chromosome balanced by bli-4- and GFP-marked translocation. Heterozygotes are WT with pharyngeal GFP signal, and segregate WT GFP, arrested hT2 aneuploids, and non-GFP ok1210 homozygotes (grotty sterile). Homozygous hT2[bli-4 let-? qIs48] inviable. Note: qIs48 has been observed to recombine off hT2, typically leaving behind a functional homozygous viable hT2 with Bli-4 phenotype. Pick WT GFP and check for correct segregation of progeny to maintain.|"Made_by: Anna Rankin"|"Mutagen:UV/TMP"|"This strain was provided by the C. elegans Reverse Genetics Core Facility at the University of British Columbia, which is part of the international C. elegans Gene Knockout Consortium, which should be acknowledged in any publications resulting from its use."

Affected Gene: WBGene00000254(bli-4)|WBGene00006823(unc-94)

Genomic Alteration: WBGene00000254(bli-4), WBGene00006823(unc-94)

Catalog Number: WB-STRAIN:WBStrain00036100

Database: WormBase (WB)

Database Abbreviation: WB

Availability: available

Alternate IDs: WB-STRAIN:VC828, CGC_VC828

Organism Name: VC828

Record Creation Time: 20230227T013651+0000

Record Last Update: 20260815T163304+0000

Ratings and Alerts

No rating or validation information has been found for VC828.
