Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.6taheie>

Authors: Laura Sánchez

Group: AEGIS - Madrid iGEM 2019

Summary: Transformation of competent Escherichia coli cultures with heterologous DNA. This protocol allows the introduction of external DNA into competent E. coli cells. Typically, the piece of DNA consists of a plasmid, either for its cloning or for heterologous protein expression.
