Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.bdcei2te>

Authors: Kirstyn Brunker

Summary: This protocol details the steps involved to perform RNA extraction on rabies virus brain tissue samples collected by the WHO recommended "straw method" in the field (Meslin F-X, Kaplan MM, Koprowski H. Laboratory techniques in rabies. World Health Organization; 1996.[10]). The protocol is field-friendly and can be performed using portable, battery powered equipment.
