Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.ffhbjj6>

Authors: Darach Miller

Summary: The aim of this protocol is to describe how to do a very reproducible upshift of a nitrogen-limited yeast culture to nitrogen non-limited conditions. In order to do this with enough cells to make inefficient analysis (ie RATEseq) feasible, we start in the chemostat for high-cell counts.
