Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.hpnb5me>

Authors: Andrés Ramírez, Albane Ruaud, Fernan Federici, Peter von Dassow

Group: Protist Research to Optimize Tools in Genetics (PROT-G)

Summary: This protocol has been optimized for electroporation of natural communities in coastal surface waters. As natural communities may vary in different places we recommend to use this protocol as a starting point and re-optimize according to the results. Guidelines are provided.
