Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.pqadmse>

Authors: Masahito Yamagata

Group: RANbody forum

Summary: Each P-RANbody consists of a HRP reporter and a nanobody that binds to antigen(s). This is a protocol to stain cells and tissues with P-RANbodies. The method is similar to common immunostaining protocols. However, this protocol focuses on some important tips.
