Protocol Information

URL: <https://dx.doi.org/10.17504/protocols.io.t3neqme>

Authors: Hannah Zurcher

Summary: This protocol is designed for use with food-safe materials. It may be used to illustrate principles of gel electrophoresis for children, or as a party novelty for scientifically-minded adults. It is currently a work in progress and will be updated as necessary. Currently different colors of food dye will run for different times but will not form distinct bands.
