

RADIANT

Rare and Atypical Diabetes Network

“My doctor knew I didn’t have the typical features for type 1 or type 2 diabetes. We didn’t know what to do next.”

RADIANT is a network of institutions across the U.S. studying atypical forms of diabetes. Our research staff identify people with atypical diabetes and learn more about their health.

You can help shape the future of diabetes care.

Visit www.atypicaldiabetesnetwork.org for more information

RADIANT

Rare and Atypical Diabetes Network

Who can join?

Anyone with an atypical form of diabetes.
Please reach out to our team to learn more.

Why should I join?

- You may learn more about your diabetes.
- Help us better understand all types of diabetes.

What is expected if I join?

- Questionnaires
- Genetic testing called whole genome sequencing
- Blood draws
- Other procedures as needed
